DATAComm PLUS LAUNCHES POWERFUL IT NETWORK ASSESSMENT TOOL

Sophisticated Technology Assesses Customers' Networks in Less Than 30 Minutes

FRANKLIN, WI – September 26, 2012 – DataComm Plus, a leading unified communications provider, announced today that the company has started implementing a powerful IT network assessment tool. The sophisticated technology provides businesses with extraordinary insight into their IT infrastructure, critical devices and other endpoints. This tool enables DataComm Plus to immediately assess the stability of a customer's network and provide real-time recommendations to improve overall performance and security.

DataComm Plus deploys network assessments when meeting with small to mid-sized business (SMBs) in the local area. Technicians are able to plug a small device into existing servers and within roughly 30 minutes, those technicians are able to gain a comprehensive understanding of network activity and applications. During the discovery phase, the tool highlights existing threats on the network, security holes or other areas of concern.

Interestingly enough, most problems are usually solvable with minimal effort. For example, the tool runs a password strength analysis on every endpoint on the network and can identify potential risks to the network. More often than not, a simple password change can fix this problem. Additionally, Security Risk Report includes a proprietary Security Risk Score and chart showing the relative health (on a scale of 1 to 10) of the network security, along with a summary of the number of computers with issues. Another area of concern for most small business owners is when employees download software programs that drain bandwidth or expose the business to threats such as viruses. After the discovery phase is conducted and the tool has uncovered network issues worth investigating, business owners receive an executive summary with all pertinent findings and recommended action steps. "It's very powerful to give our customers this level of insight into their network," stated Thomas Sodemann, Vice President of DataComm Plus. "Business owners want

technology to run efficiently so they can benefit from increased productivity and profitability. As their technology advisor, it is our responsibility to ensure this result."

ABOUT DATAComm PLUS

Since 1981, DataComm Plus has committed to establishing lasting business relationships with our clients. DataComm Plus offers innovative voice, video, and data networking solutions that increase our clients' profitability and gives them a competitive advantage in their marketplace.

DataComm Plus recognizes the critical need for a communications company that combines leading technology with top-quality service and support.

Our mission is to provide exceptional value through managed services that eliminate technological obsolescence, ensure a fixed cost for our business partners, and maximize the profits, productivity, image, and competitive advantage of those partners. Highly trained and motivated professionals give you measurable results.
